Projects

Personal Website

<https://nbanoob.github.io/>

Zombie Cartastrophe

A zombie action game with a top-down perspective where the player is in control of a weaponized car and they must survive waves of zombies.

- *Built using Construct 2, a HTML5-based game editor*
- *Led the project with 2 other people*
- *Was in charge of the technical side of the project*

Unnamed Discord Bot

A bot on the communication platform Discord that started as a small project to entertain friends. It slowly started becoming a more feature filled bot with practical uses.

- *Created using the Discord.py API*
- *The only practical feature it has currently is that it can delete messages efficiently*
